OBJECTIVE

Seeking a challenging and growth-oriented position in Information Technology and Information Systems, where I can apply my technical knowledge, analytical skills, and practical experience while contributing to an efficient and professional work environment.

EXPERIENCE

Systems Analyst | Al-Jadar Almasi General Contracting Est. | Jeddah, Saudi Arabia

Jul 2025 - Present

- Analyze internal systems and business processes and recommend improvements to enhance operational efficiency.
- Organize and analyze company data, including project records, operational data, and financial documents.
- Handle and review VAT reports and support accurate tax filing and compliance.
- Support digital transformation and implement practical IT solutions for business processes.
- Coordinate between IT and construction teams to align system and operational requirements.

EDUCATION

BSc Computer & Information Systems | Najran University | Sep 2019 - Aug 2023

CERTIFICATIONS

- Microsoft Certified: Power BI Data Analyst Associate (PL-300)
- Cisco Certified Network Associate (CCNA)
- Microsoft Certified: Azure Fundamentals (AZ-900)
- ITIL 4 Foundation

TRAINING

Network and Data Center Administrator (COOP Training) | Deanship of Information and Communication Technology | Najran University | 2023

Voluntary Work - IT Department | Al-Hada Military Hospital | Taif | 2025

Completed a 3-month voluntary program in the IT department, assisting with computer systems, network operations, technical support, and IT infrastructure in a healthcare environment.

PROJECT

Cybersecurity Education Application for Children | Najran University

Developed a mobile application using Flutter and Android Studio to teach children ages 6-13 about privacy, online safety, and cybersecurity concepts through clear and age-appropriate content.
